

Coal Mining & Processing's Annual Index for 1979 (Vol. 16)

A

Adaptable washing plants handle seven seams, September . . . 72
AEP's new preparation plant: Largest in the West, January . . . 66
Aerial photography & computergraphics speed exploration, February . . . 54
AFC chains: Problems and solutions, December . . . 76
Agston, J.
—How to plan ground control, December . . . 70
Alpert, S.
—Liquefaction and gasification: A promising outlook, August . . . 44
Ambition, drive & skill push Curry to the top, June . . . 14
AMC Coal Convention Preview, May . . . 82
AMC preliminary program, May . . . 84
Amos, E.T.
—Clearing the way to faster haulage, November . . . 80
An open letter to President Carter, (Comment), January . . . 9
Atmospheric sulfates & mortality, March . . . 88

B

Berg-Hansen
—What's wrong with the new leasing program, July . . . 63
Big brother and the airwaves, (Comment), November . . . 9
Blakely, Wes
—Ambition, drive & skill push Curry to the top, June . . . 14
Bly, Robert, L.
—Tackling cooling system problems, February . . . 72
Bowen, R.J. & Bowen, W.R.
—Challenge in the West: How to mine thick seams, January . . . 70
Bowen, R.J. & Bowen, W.R.
—Challenge in the West: How to mine thick seams, February . . . 61
British computers establish mine-control, November . . . 98
British firm Americanizes longwall, February . . . 68
Buntain, D.
—British computers establish mine-control, November . . . 98

C

Can a hydraulic excavator increase your mine productivity?, March . . . 62
Carter, Russell, A.
—AEP's new preparation plant: Largest in the West, January . . . 66

January . . . 66
—Clovis Point: The newest Powder River Basin producer, November . . . 72
Carter's ambivalence on coal, (NCA Hotwire), October 23
Challenge in the West: How to mine thick seams, January . . . 70
Challenge in the West: How to mine thick seams, February . . . 61
Chambliss, Everett
—Choosing and using conveyor belt fasteners, December . . . 66
—Modular-design plant cuts gob recovery cost, July . . . 72
Charleston Exposition: Bigger than ever, April . . . 82
Chemical comminution: An improved route to clean coal, August . . . 68
Chemical desulfurization: A misunderstood technology, August . . . 60
Clearing the way to faster haulage, November . . . 80
Clovis Point: The newest Powder River Basin producer, November . . . 72
Coal analysis meets customers' needs, June . . . 56
Coal in a time of trial, (NCA Hotwire), November . . . 23
Coal-oil mixtures: A good idea from DoE, March . . . 68
Preview: Coal Conference & Expo V, October . . . 85
Conventional mining reappraised, August . . . 52

D

Decisions for a decade, (NCA Hotwire), May . . . 105
Decontrol now, (Comment), February . . . 9
Denationalizing the west, (Comment), December . . . 9
Directory of new technology, March . . . 74
Dry chemicals douse fires, April . . . 114
Dual auger drill triples rate, November . . . 92

E

Energy Supply tailors operation to smaller mines, August . . . 56
Exhibition in print, May . . . 88
Exhibition in print, October . . . 86
Exhibitors at the 1979 Eastern Mining & Industrial Exposition, April . . . 83
Experience & instinct assure S&S growth, April . . . 98

F

Falkirk: A sleeping giant awakens, November . . . 66
Formosa, B.

—Management practices must change, July . . . 100
From cleaning: More coal per ton, September . . . 66

G

George T.J.
—Chemical desulfurization: A misunderstood technology, August . . . 60
George, T.J., Cambell, T.C., and Bergman, P.E.
—Coal-oil mixtures: A good idea from DoE, March . . . 68
Get the big picture—to comply with reclamation laws, February . . . 57
Goodman gears up for the 1980's, October . . . 68
Governors seize the initiative, (NCA Hotwire), December . . . 23
Guccione, Eugene
—Experience & instinct assure S&S growth, April . . . 98
—Falkirk: A sleeping giant awakens, November . . . 66
—Goodman gears up for the 1980's, October . . . 68
—Paradox at Orchard Valley, December . . . 54
—Restoring America's energy security, July . . . 94
—US must reconsider its anti-coal policy, June . . . 36

H

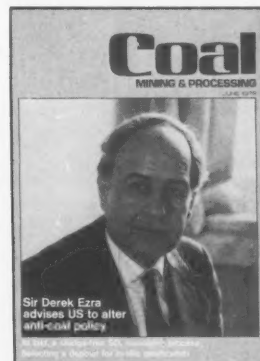

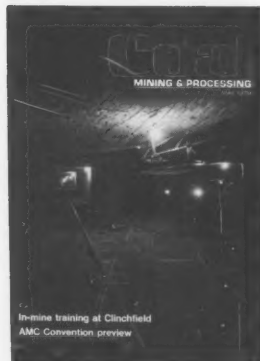

Hand, John, W.
—Selecting a deposit for in-situ gasification, June . . . 62
Hanson, B.D.
—New cutting concepts for continuous miners, Oct. . . 62
How to implement mine illumination, March . . . 83
How to plan ground control, December . . . 70
Hydraulic hose: Making it work when the pressure is on, July . . . 84

I

Imagery analysis: Predicting hazards, February . . . 48
Indexing inflation: A must for coal firms, April . . . 102
Indexing inflation: No cure, (Comment), April . . . 11
International prep conference blends technology and culture, September . . . 110
Ireland Mine: Bigger still with longwall, December . . . 60
IVY Tech develops surface mine technologists, July . . . 86

J

Janes, J.R. and O'Day, M.T.
—Shedding new light on longwall, April . . . 74

K	
Keeping the lid on insurance costs, April	110
Keeping the roof up, September	100
Keeping V-belts in the groove, November	88
Keeping your engines cool to keep availability up, May	78
Kraft, Betsy	
—Supervisory training catches on, October	58

L	
Lambrecht, Sara M.	
—Dry chemicals douse fires, April	114
Lihach, Nadine	
—From cleaning: More coal per ton, September	66
Liquefaction and gasification: A promising outlook, August	44
Lisle, Alan	
—IVY Tech develops surface mine technologists, July	86
Loading shovels attain 96% availability, July	76
Lord, Robert V.	
—Using exploration for all its worth, February	52

M	
MSHA's always on call, October	74
Making fines pay, September	96
Making sense of pollution, (Comment), October	9
Making the most of precious fuel, November	78
Management practices must change, July	100
Managers' attitudes: Union vs. nonunion, May	62
Mason, Richard H.	
—Adaptable washing plants handle seven seams, September	72
—AFC chains: Problems and solutions, December	76
—Ireland Mine: Bigger still with longwall, December	60
—Coal analysis meets customers' needs, June	56
—Rapo plant mines refuse dumps, April	108
—Slot machine pays out faster haulage, January	86
—United lab ensures quality, September	76
—Wilcox miner sprouts automatic jacks, March	66
McDuffie expedites coal exports, September	106
Mechanical drive improves mid-size haulers, April	78
Mink, O.G.	
—Management practices must change, July	100
Modular-design plant cuts gob recovery cost, July	72
Morel, W.C.	
—Chemical desulfurization: A misunderstanding technology, August	60
Mountain Drive Coal strips to maximize production, January	78
Much ado about synfuels, November	94

N	
New cutting concepts for continuous miners, October	62
New dimensions for vibrating screens, September	80
New hoists modernize Jim Walter mines, July	108
New scrubber process is sludge free, June	50
Nickeson, Floyd	
—Keeping the roof up, September	100
No cause for gloom, May	74

O	
Ohl, Eric	
—New dimensions for vibrating screens, September	80
Oil Analysis: The sure way to schedule maintenance, July	92
Old & new stripping machines produce together, June	40
Outlook '79: On balance, fair, January	60
Overcapacity: The risk subsides, (NCA Hotwire), September	23

P	
Paradox at Orchard Valley, December	54
Plants, K.D.	
—Chemical desulfurization: A misunderstanding technology, August	60
Pray, W.	
—Choosing and using conveyor belt fasteners, December	66
Preparation/Processing	
—Adaptable washing plants handle seven seams, September	72
—AEP's new preparation plant: Largest in the West, January	66

—Chemical Communion: An improved route to clean coal, May	68
—Chemical desulfurization: A misunderstanding Technology, August	60
—Coal analysis meets customers' needs, June	56
—Coal-oil mixtures: A good idea from DoE, March	68
—Directory of new technology, March	74
—From cleaning: More coal per ton, September	66
—International prep conference blends technology and culture, September	110
—Liquefaction and gasification: A promising outlook, August	44
—Keeping V-belts in the groove, November	88
—McDuffie expedites coal exports, September	106
—Modular-design plant cuts gob recovery cost, July	72
—Much ado about synfuels, November	94
—New dimensions for vibrating screens, September	80
—New scrubber process is sludge-free, June	50
—Processor competes with portable plant, July	80
—Rapo plant mines refuse dumps, April	108
—Selecting a deposit for in-situ gasification, June	72
—Synfuels British style: NCB's gas extraction of coal, September	84
—United lab ensures quality, September	76
Preparing equipment for winter operation, November	76
Processor competes with portable plant, July	80
Products & services featured at the 1979 Charleston Exposition, April	84
Profit: A lost word, (Comment), May	9

Q	
Quakenbush, V.	
—Chemical communion: An improved route to clean coal, May	68

R	
Rapo plant mines refuse dumps, April	108
Reeves, Aidley M.	
—New scrubber process is sludge-free, June	50
Regulatory analysis can help, (NCA Hotwire), February	37
Resin roof bolting saves mine, January	64
Respiratory protection—There's more than meets the eye, October	81
Restoring America's energy security, July	94
Ripping aids reclamation at eastern Kentucky mine, July	68
Roeckle, W.W.	
—New cutting concepts for continuous miners, October	62

S	
Schulties, C.W.	
—Conventional mining reappraised, August	52
Scott, Frank E.	
—British firm Americanizes longwall, February	68
—MSHA's always on call, October	74
—Much ado about synfuels, November	94
Selecting a deposit for in-situ gasification, June	62
Shedding new light on longwall, April	74
Skinner, Charles S.	
—How to implement mine illumination, March	83
Slot machine pays out faster haulage, January	86
Slurry pipelines: A maze of rights, August	66
Smiley, Carl H.	
—Keeping your engines cool to keep availability up, May	78
—Mechanical drive improves mid-size haulers, April	78
—Oil Analysis: The sure way to schedule maintenance, July	92
—Preparing equipment for winter operation, November	76
Spencer, D.F.	
—Liquefaction and gasification: A promising outlook, August	44
Sprouls, M.	
—Falkirk: A sleeping giant awakens, November	66
—Mountain Drive Coal strips to maximize production, January	78
—Respiratory protection—There's more than meets the eye, October	81
—Ripping aids reclamation at eastern Kentucky mine, July	68
—Training mine produces coal & experience, May	58
Supervisory training catches on, October	58
Surface mining	
—Can a hydraulic excavator increase your mine productivity?, March	62

—Clearing the way to faster haulage, November	80
—Clovis Point: The newest Powder River Basin producer, November	72
—Directory of new technology, March	74
—Dual auger drill triples rate, November	92
—Energy Supply tailors operation to smaller mines, August	56
—Falkirk: A sleeping giant awakens, November	66
—Hydraulic hose: Making it work when the pressure is on, July	84
—IVY Tech develops surface mine technologists, July	86
—Keeping your engines cool to keep availability up, May	78
—Loading shovels attain 96% availability, July	76
—Making the most of precious fuel, November	78
—Mechanical drive improves mid-size haulers, April	78
—Mountain Drive Coal strips to maximize production, January	78
—Oil Analysis: The sure way to schedule maintenance, July	92
—Old & new stripping machines produce together, June	40
—Preparing equipment for winter operation, November	76
—Ripping aids reclamation at eastern Kentucky mine, July	68
—Tackling cooling system problems, February	72
—What's wrong with the new leasing program, July	63
Symonds, Donovan F.	
—International prep conference blends technology and culture, September	110
Synfuels British style: NCB's gas extraction of coal, September	84

T	
Tackling cooling system problems, February	72
The 1979 legislative program, (NCA Hotwire), March	59
Training mine produces coal & experience, May	58

U-V	
Underground mining	
—AFC chains: Problems and solutions, December	76
—British firm Americanizes longwall, February	68
—Challenge in the West: How to mine thick seams, January	70
—Challenge in the West: How to mine thick seams, February	61
—Choosing and using conveyor belt fasteners, December	66
—Conventional mining reappraised, August	52
—Directory of new technology, March	74
—Dry chemicals douse fires, April	114
—Experience & instinct assure S & S growth, April	98
—How to implement mine illumination, March	83
—How to plan ground control, December	70
—Ireland Mine: Bigger still with longwall, December	60
—Keeping the roof up, September	100
—MSHA's always on call, October	74
—New cutting concepts for continuous miners, October	62
—New hoists modernize Jim Walter mines, July	108
—Paradox at Orchard Valley, December	54
—Resin roof bolting saves mines, January	64
—Respiratory protection—There's more than meets the eye, October	81
—Selecting a deposit for in-situ gasification, June	62
—Shedding new light on longwall, April	74
—Slot machine pays out faster haulage, January	86
—Training mine produces coal & experience, May	58
—Wilcox miner sprouts automatic jacks, March	66
United lab ensures quality, September	76
US must reconsider its anti-coal policy, June	36
Using exploration for all its worth, February	52

W-X-Y-Z	
Waiting at the altar, (NCA Hotwire), April	33
What Carter should have said, (Comment), September	9
What's wrong with the new leasing program, July	63
Whitehead, J.C.	
—Synfuels British style: NCB's gas extraction of coal, September	84
Wilcox miner sprouts automatic jacks, March	66
